

Aspects of IFM

<i>Aspect 1</i>	Cross sectoral integration
<i>Aspect 2</i>	Land and water management
<i>Aspect 3</i>	Laws and regulations for flood and water management
<i>Aspect 4</i>	Managing the whole water cycle
<i>Aspect 5</i>	Stakeholder involvement in decision making
<i>Aspect 6</i>	Effective use of floodwater or “positive” aspects of floods
<i>Aspect 7</i>	Community-based approach
<i>Aspect 8</i>	Tools to support decision-making (e.g. analysis of the economics of flood management)
<i>Aspect 9</i>	Effective linkage between existing institutions
<i>Aspect 10</i>	Best-mix of structural and non-structural measures
<i>Aspect 11</i>	Free and open exchange of data
<i>Aspect 12</i>	Multi-functional solutions
