

Group Slovakia, Czech Republic,
Slovenia, Switzerland, WMO

Actors:

Services

Water management

Rescue defence

Local players

- Pressing needs - services

Forecasting, nowcasting

Hazard mapping

- Pressing needs – institutional level

Building Local Flood Warning System –
financial schemes

- Interministerial level

No problems in flood issues in some countries

Importance of coordination mechanisms
(Flood commissions)

- Facilitator

Must be independent

Municipal association, GWP ?

Best case independent on local level

- Current budgetary situation

Problem – mostly structural investments

Flash floods:

Interministerial meetings

Utilize experience of municipal Associations

Pilot projects

- Privat sector role

- Separate National strategy for flash flood management

There is a need

Inclusion into existing documents

Manuals, guidance, training, action plan
